FINANCIAL AFFAIRS OF THE PRINCE OF WALES.

New York, August 8—A London letter says a report has suddenly gained currency that the long expected crisis has occurred in the financial sifairs of the Prince of Wales, and that the Ministry have made up their minds to propose to the House of Commons, at its next session, to pay his debts. The sum named is £940,000, four times the sum voted in 1787 to appease the creditors of that pattern of royalty who alterward became George IV.

About paying the bills there are certain to be two powerful and contradictory sentiments: One, that the hone of the nation is concerned in providing for the debts of its future King; the other, that these debts are of a character which ought to be paid out of the accumulated fortune of the Queen has been receiving, ever since the deets of Prince Albert, the whole of the date of Princ
